

Part 0: 5

Juancarlos.arteaga1@Gmail.com

The screenshot shows a web browser at the URL `fullstack-exampleapp.herokuapp.com/spa`. The browser's address bar and tabs are visible at the top. The main content area displays a form with a text input field and a 'Save' button. A tooltip indicates the input field's dimensions as 173 x 21. Below the browser window, the 'Elements' panel shows the HTML structure of the page. Annotations with callout boxes explain specific parts of the page:

- 1- Url address request for user: load spa.html one time**: Points to the browser's address bar.
- 2- load main.css**: Points to the `<link rel="stylesheet" type="text/css" href="/main.css">` tag in the `<head>` section.
- 3- Load spa.js**: Points to the `<script type="text/javascript" src="spa.js"></script>` tag in the `<head>` section.
- 4- The form don't have attribs action or method**: Points to the `<form id="notes_form">` tag in the `<body>` section.

The HTML structure shown in the 'Elements' panel is as follows:

```
<!doctype html>
<html>
  <head>
    <link rel="stylesheet" type="text/css" href="/main.css">
    <script type="text/javascript" src="spa.js"></script>
  </head>
  <body>
    <div class="container">
      <h1>Notes -- single page app</h1>
      <div id="notes">
        <ul class="notes">...</ul>
      </div>
      <form id="notes_form">
        <input type="text" name="note" == $0
        <br>
        <input type="submit" value="Save">
      </form>
    </div>
  </body>
</html>
```
